Stone Mountain TruBlu™ Bluetooth® Microphone User Manual

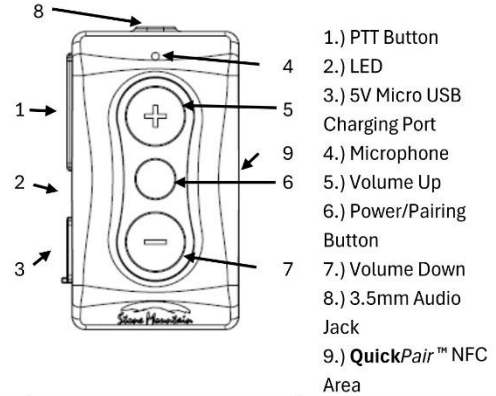

The Stone Mountain TruBlu™ Bluetooth® microphone is a compact wireless microphone that supports LMR, Android and iOS devices running Push to Talk (PTT) applications¹ as well as full duplex phone calls². The 3.5mm audio jack allows for discrete communication, as well as playing media from the paired device³.

Starting Out

Charge the microphone for at least two (2) hours prior to first use. The LED will turn **red** to indicate charging, and **blue** to indicate that charging is complete. When plugged in to charge, the microphone will reset and power off.

Notes:

1. Supports major OEM PTT applications including Zello, Workforce Connect PTT Pro, ESChat, etc.
2. Cellular service required.
3. This headset does not have an integrated speaker. All audio must be routed through an accessory connected to the 3.5mm audio jack.

Button	Primary Function	Additional Function
Power Button	Power On/Off, Pairing	-Play Pause Media -Call Answer/Terminate/Reject
PTT Button	Engage PTT (PTT over Cellular, LMR, Etc.)	N/A
Volume Up	Long Press: Increase Volume of paired device	Short Press: Media Control – Next Song
Volume Down	Long Press: Decrease Volume of paired device	Short Press: Media Control – Previous Song

Operating the Headset

Power On: Press and hold the power button for two (2) seconds and release. The LED will briefly turn **purple**, then blink **red** once. The headset will audibly say “Power On”, accompanied by a **beep**. The LED will then blink **blue**.

Power Off: Press and hold the power button for four (4) seconds. The LED will briefly turn **purple**, and audibly say “Power Off”.

QuickPair™ NFC Pairing (Android Only): Enable NFC on your Android device. With the microphone turned off, press and hold the power button for six (6) seconds and release when the LED starts flashing **red** and **blue**. Place the right side of the microphone flush to the NFC reader on your device. Allow up to 10s for the device to recognize the microphone. Select “Pair” when the message “Pair with B02PTT?” appears. Upon successful pairing, the microphone will audibly say “Pairing successful”, followed by “Connected” along with a short beep.

Traditional Pairing: With the microphone turned off, press and hold the power button for six (6) seconds and release when the LED starts flashing **red** and **blue**. Follow the instructions of the device/phone to connect and pair the microphone, selecting **B02PTT**. Upon successful pairing, the microphone will audibly say “Pairing successful”, followed by “Connected” along with a short beep.

Note: Wait 30s after pairing/mapping PTT button prior to engaging in a duplex/PTT call, etc.

Transmitting Audio (Tx): To transmit audio, press the PTT button, and speak into the microphone. To avoid distortion, keep the microphone ~6” from your mouth. Release the PTT button when finished transmitting.

Receiving Audio (Rx): Incoming audio will automatically be received and played through the accessory attached to the 3.5mm audio jack. **Caution:** Always set the volume to low and slowly increase to a comfortable level to avoid exceeding safe listening levels.

Phone Call Control: Press the power button to answer or terminate an incoming call. To reject an incoming call, quickly double-press the power button.

Media Control: When playing music or other media, press the power button to play and pause media. Press the Volume Up button to switch to the next item in the playlist and press the Volume Down button to switch to the previous item in the playlist.
