

BluSkye® iOS Quick Start Guide for Wave PTX

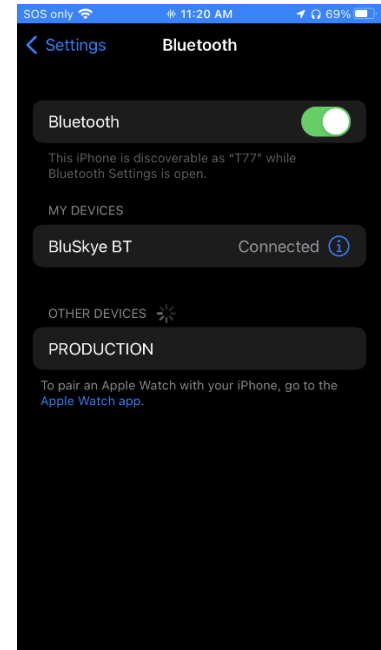

For the most up-to-date app settings and configurations, check support.motorolasolutions.com.

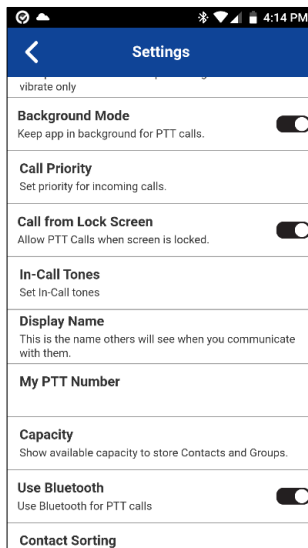

1. Ensure your **BluSkye® Speaker Microphone (SM)** is powered off. Press the power button for 6 seconds. The SM will beep twice at 3 seconds, and twice again at 6 seconds. The LED will begin to alternate between blue and red.

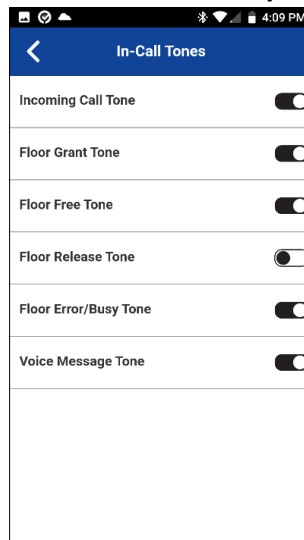

2. On your iOS device, navigate to **Settings > Bluetooth** and enable Bluetooth. Select **BluSkye BT**.

3. Once paired the SM will beep twice and the LED will begin to blink blue.

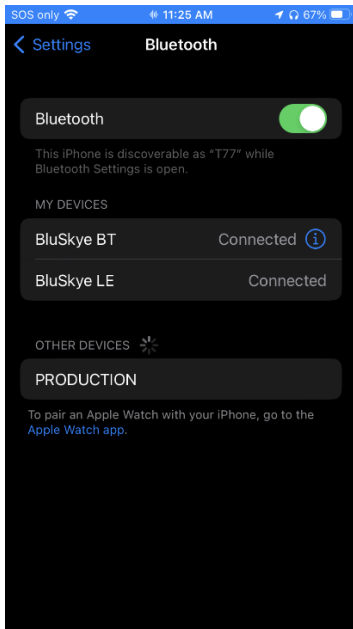

4. Launch the Wave App. Navigate to **Settings** and enable **Use Bluetooth**.

5. Select **In-Call Tones** and enable **Floor Grant Tone**.

Recommended:

- Enable **Call From Lock Screen**: This allows the SM to be used while the paired device is locked or asleep.
- Enable **Background Mode**: This allows the SM to be used when the app is running in the background with other apps in the foreground.

7. Return to the iOS Bluetooth settings and ensure that both **BluSkye BT** and **BluSkye LE** are connected.
